Field Xpert SMT50

Universal, high-performance tablet PC for device configuration

Application

The Field Xpert SMT50 tablet PC allows technicians to perform mobile device configuration in non-hazardous areas with its seamless out-of-the-box experience. It manages Endress+Hauser and third-party field devices with a digital, wired and wireless communication interface and documents the progress of the work.

The SMT50 is designed as a complete solution. It comes with a pre-installed driver library of more than 3000 devices and is an easy-to-use, touch-enabled tool for managing field devices throughout their entire life cycle.

The integrated LTE module ensures that the tablet is online even if a WLAN is not available. AT&T is supported in the USA, while Verizon is not.

Your benefits

- Robust tablet with large 12" display and a battery runtime of up to 8 hours.
- Touch-enabled device configuration software for optimized asset management.
- Direct link to Netilion, Endress+Hauser's IIoT ecosystem.
- Pre-installed device driver libraries for all of the important industrial protocols.
- Fast connection to devices with a single click thanks to automatic hardware detection. Online application software and DTM/driver update service offer new functionality and maximum security.
- Integrated Heartbeat Verification incl. PDF documentation.
- Connection to Endress+Hauser Bluetooth and WLAN devices - perfect for difficult-to-access instruments.

Function and system design

Function

The Field Xpert SMT tablet PC for universal device configuration supports a variety of protocols, the Endress+Hauser service protocols, and connection to Endress+Hauser Bluetooth field devices and Endress+Hauser WLAN field devices. You can connect the field devices directly via a suitable interface, such as a modem (point-to-point), a bus system (point-to-bus) or a wireless connection (WLAN/Bluetooth).

The Field Xpert software package is fast, easy and intuitive to use.

The Field Xpert device library already has several thousand pre-installed device and communication drivers. They can be used to operate practically all HART and FOUNDATION Fieldbus devices (FieldComm Group libraries). Furthermore all Endress+Hauser field device drivers are installed. The generic HART DTM and PROFIBUS profile DTMs also enable operation of all the important basic functionalities of the relevant field devices.

In addition, the tablet PC features the FDI Package Manager for the installation of FDIs and the IODD DTM Configurator for installing IODDs. You can install new device drivers (DTMs, FDIs and IODDs) on the Field tablet PC at any time.

Application examples

HART point-to-point connection via USB/HART modem FXA195

You can use the Endress+Hauser USB/HART modem FXA195 to establish a connection automatically from the tablet PC to a HART field device.

 2 Point-to-point connection with a HART field device

- 1 Field Xpert SMT70 tablet PC
- 2 USB/HART modem Commubox FXA195
- 3 HART field device

 To establish communication with the HART field device, a resistor of at least 250 Ω must be provided in the circuit. The integration of the resistor depends on the system architecture and the power supply used.

For detailed information: Documentation for USB/HART modem Commubox FXA195

Connecting via WLAN or Bluetooth

You can connect the tablet PC to a WLAN or Bluetooth-enabled Endress+Hauser field device via a WLAN or Bluetooth.

PROFIBUS point-to-bus connection

You can establish a connection from the tablet PC to a PROFIBUS PA field device using a wizard by means of the Endress+Hauser Fieldgate SFG500. The connection from PROFIBUS DP to PROFIBUS PA is established via a segment coupler such as Siemens DP/PA link or Pepperl+Fuchs SK3.

Operability

Operation concept

The Field Xpert software provides three different methods to establish a connection to the field device. The version that is possible depends on the protocol, the interface (modem/gateway) and the field device.

- Automatic: Connection to the interface (modem)/field device is established automatically.
- Wizard: You establish a connection to the interface (modem/gateway) and the field device step by step.
- Wireless: Select this option if you wish to establish a connection to an Endress+Hauser Bluetooth or WLAN field device.

Certificates and approvals

Current certificates and approvals for the product are available at www.endress.com on the relevant product page:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Downloads**.

Ordering information

Detailed ordering information is available from your nearest sales organization www.addresses.endress.com or in the Product Configurator at www.endress.com:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Configuration**.

Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
- Depending on the device: direct input of information specific to the measuring point, such as the measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

Scope of delivery

The scope of delivery comprises:

- Field Xpert tablet PC with handle
- AC charger (100 to 240 V_{AC}, 1.5 A, 50 to 60 Hz) with connecting cable US, UK, CH, IT, ZA, AU
- Software and interfaces/modem as per order

Accessories

Device-specific accessories

The accessories currently available for the product can be selected at www.endress.com:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Spare parts & Accessories**.
