 The Power of Know How

Operation and system construction

Measurement principle	Electronic measurement and conversion of input signals in industrial temperature measurement.
Measurement system	The iTEMP PCP TMT 181 temperature head transmitter is a two wire transmitter with an analogue output. It has measurement input for resistance thermometers (RTD) in 2-, 3- or 4-wire connection, thermocouples and voltage transmitters. Setting up of the TMT 181 is done using the TMT 181A configuration kit.
